VIENNA'S LEADING PRIVATE HOSPITAL

CARE FOR YOUR HEALTH

A regular health check helps to identify diseases early and lead a healthy and painfree life. Therefore, Rudolfinerhaus offers screening investigations, which you can carry out conveniently and efficiently within a day. The great advantage for you: All examinations are performed on premise in our clinic and evaluated immediately. Our preventive check ups consist of different comprehensive examinations. The additional Full Body Screening® (with MRI) and risk screening provide you with more knowledge about your health condition.

MEDICAL CHECK UP – A DAY FOR YOUR HEALTH

Here is how your screening day goes:

- Explanatory interview and blood sampling in the Private Outpatient Clinic (please come fasting)
- Examinations
(the number of examinations depends on the selected check up)
- Breakfast in our restaurant
- Consultation with the physician & discussion of the patient's clinical findings by appointment (optionally by video-call as well)

Of course, you can complement your preventive medical check-up with your individual preventive care issue. If you wish, we can also add any specific examinations or consultations by a specialist to your check up program, such as:

- Specialist in gynaecology as well as mammography, breast ultrasound, predictive genetic testing, DEXA measurement (bone density)
- Specialist in urology
- Specialist in neurology
- Specialist in dermatology
- Specialist in ENT
- Specialist in orthopaedics
- Specialist with specific areas of expertise such as rheumatology, osteology, diabetology, thyroid, nephrology
- 24-hour blood pressure measurement, 24-hour ECG
- Sleep laboratory and much more.

FULL BODY SCREENING® – INVESTIGATION WITH MRI

The Full Body Screening® uses magnetic resonance imaging, which rapidly provides insight into your health condition in just one day. Our high-resolution MRI scanners enable us to assess your organ systems comprehensively (head, brain angiography, ribcage, abdomen) and can detect changes, like inflammations and tumors, at an early stage.

RISK SCREENING

This screening with multiple CT scans (calcium score, chest) serves to detect cardiovascular risks and smallest tumours so that timely countermeasures can be taken.

COMPLEMENTARY PACKAGES

(only in combination with one of the offered medical check ups)

FULL BODY SCREENING® (MRI)

The Full Body Screening® offers a comprehensive radiological scan of your body with a high-resolution MRI scanner, in particular:

- MRI head
- MRI brain angiography (TOF)
- MRI thorax
- MRI abdomen (upper & lower abdomen)
- Sedation is optional (subject to a charge & advance booking)

990€

RISK SCREENING (CT scan, patients with risk profile)

This screening offers a comprehensive radiological scan of your body with CT, for better cardiovascular risk assessment and smallest tumors:

- CT calcium score (heart) – low radiation exposure
- CT thorax – low dose

490€

Prices include 10 % VAT. Valid from 1.3.2026. Subject to change.

COLON CANCER PREVENTION – SAFE AND AS COMFORTABLE AS POSSIBLE

Colon cancer can be efficiently treated at an early stage but prevention is always preferable. Therefore, people aged 45+ (and earlier in case of family predisposition) should undertake a preventive colon examination (colonoscopy) every 6–10 years. Please discuss all information needed to prepare for the procedure and for laxative with our specialist in the Day Clinic. In order to perform colonoscopy for patients as comfortably and painlessly as possible, we offer sedation by an anaesthesiologist. He also monitors the patient's sleep throughout the procedure. After the intervention, we bring you to an individual relaxation room, where you can wake up and rest. Please make sure that you do not drive a vehicle after a sedation.

COLONOSCOPY

Anaesthesia, specific lab values and histology included (polypectomy is possible at an extra charge)

For policyholders of Austrian private inpatient insurance, we bill your insurance provider directly. For patients with an international health insurance, check the billing options with your insurance provider.

· Without Austrian private inpatient insurance 1.390€

GASTROSCOPY & COLONOSCOPY

Anaesthesia, specific lab values and histology included (polypectomy is possible at an extra charge)

· For patients with Austrian private inpatient insurance, we bill the colonoscopy directly to your insurance provider. 690€

· Without Austrian private inpatient insurance 1.990€

Prices include 10% VAT. Valid from 1.3.2026. Subject to change.

RUDOLFINERHAUS – VIENNA'S LEADING PRIVATE HOSPITAL

As a private hospital, Rudolfinerhaus offers patients all the important prerequisites for optimal care, not only on an outpatient basis, but also, of course, during inpatient stays. As a private patient you are free to select your doctor yourself. The doctor will take all the time you need, attend to all your procedures, and remain your point of contact in all medical issues. State-of-the-art infrastructure, the expertise of our skilled specialists, and our highly qualified nursing staff are at your disposal around the clock. In addition to optimal medical care, Rudolfinerhaus offers a most modern ambience for your well-being – generously spaced premium rooms with room service, our park, and our à la carte restaurant – all invite you to linger in the premise. Our chef will indulge you with a wide range of dishes and types of food.

SERVICE & COMFORT

- Efficient schedule of examinations & rapid evaluation of all findings by our highly qualified doctors
- Most modern medical equipment
- All examinations take place under one roof
- Discussion on the patient's findings is also possible by video-call
- Translation of the patient's medical reports into a foreign language if required, interpreting service at an extra charge
- À la carte restaurant in our lobby
- Wi-Fi in the entire hospital
- Free electronic access to more than 400 Austrian and foreign newspapers and magazines in all waiting rooms
- Underground car park
